

The Habitat Professionals Forum Roadmap to a Just and Regenerative Recovery

The Habitat Professionals Forum has produced a Roadmap to Recovery from the major shocks to our global economic social systems. In doing so, it has direct relevance to the findings and recommendations of the *UN's Quadrennial Review* on the progress in the implementation of the New Urban Agenda.

This Roadmap is essential if we are to re-set the trajectory of change to deliver sustainable urban development based on the principles in the New urban Agenda of the UN-Habitat and to achieve the UN's Sustainable development Goals.

This Roadmap is set out in the following documents;

1. An **Executive Summary** of the Roadmap.
- 2 The **Roadmap** itself which sets out 22 propositions to tackle the challenges created by the combined impact of the pandemic, climate change and international conflicts.
3. The **Roadmap Background Report** which sets out in more detail the reasoning and evidence that supports the Propositions in the Roadmap

In doing so the Roadmap:

- Illuminates the vital contribution of the professional community to Recovery;
- Illustrates the need and potential for more effective interventions; and
- Identifies the changes needed to recover not only from the current pandemic but also to provide resilience to future 'global shocks'.
